## Emil B. N.

Data technician specializing in infrastructure

I love working on servers and giving users the best experience, and through my 5 years of internships I have further developed my skills in the Microsoft ecosystem as well as Docker and Kubernetes on Ubuntu Linux for the most part. I am an excellent problem solver and don't let a blockage stop me from finding a solution. I always try to challenge myself on new technologies and see how they can be used to make everything more stable and efficient.

#### WORK EXPERIENCE

##### PCSYD

(05.01.2020 - 13.08.2022)

Data technician

During my internship as a computer technician specializing in infrastructure at Praktikcenter Syd (PCSYD), I was transferred to the server team where I managed various servers such as our web servers, firewalls, domain controllers, Network, Hyper-V Cluster, SAN and finally migrated our Windows Deployment Services with MDT to be managed from Microsoft Endpoint Configuration Manager (MECM) and thus streamlined our deployment process.

##### PCSYD

(07.08.2017 - 05.01.2020)

IT-Supporter

For most of my internship as an IT support trainee, I was team leader for our Windows Deployment Services team at PCSYD at EUC Syd in Sønderborg. I was responsible for keeping applications and operating systems updated for the Data Education courses at EUC Syd. The times when I had nothing to do, I used the time to learn about new technologies such as Docker, Hyper-V, pfSense and learn from our Server Team.

##### Netcompany A/S

(30.11.2022 - Nuværende)

Operations Engineer

<https://netcompany.com>

#### EDUCATION

##### EUC Syd

(05.01.2020 - 13.08.2022)

Data technician specializing in infrastructure, Data & Kommunikation

##### EUC Syd

(07.08.2017 - 05.01.2020)

IT-Supporter, Data & Kommunikation

#### PROJECTS

##### PineRiver

(01.12.2020 - Nuværende)

ServerHosting Virksomhed

It's probably the most exciting and proudest project to date. It started as a small gaming community specifically focused on Counter-Strike. Over the years, we gained a large fan base that includes over 25,000 unique players in 2020. The community evolved into a company with multiple technological solutions. Currently, I help my friend with servers and keep everything running smoothly as a learning experience and for fun.
